The board of directors (the "Board") of Sam Woo Holdings Limited (the "Company") is pleased to present the unaudited condensed consolidated financial statements of the Company and its subsidiaries (collectively the "Group") for the six months ended 30 September 2011 (the "Period") together with comparative figures for the corresponding period in 2010 (the "Previous Period").

MANAGEMENT DISCUSSION AND ANALYSIS

Financial Review

The Group recorded a turnover of HK\$24.9 million from vessel chartering for the Period while there was approximately HK\$44.3 million from the discontinued construction contract for the Previous Period. The loss before taxation for the Period was HK\$23.5 million as compared to a loss before taxation of HK\$17.8 million for the Previous Period, the increase of which was mainly due to the write off of a trade receivable of HK\$7.4 million in the Period.

As at 30 September 2011, the unaudited total assets and net assets of the Group were HK\$78.1 million (31 March 2011: HK\$85.4 million) and HK\$46.3 million (31 March 2011: HK\$69.7 million) respectively. The Board does not recommend the payment of any interim dividend for the six months ended 30 September 2011.

Business Review and Outlook

The financial data released revealed that the recovery of the United States' economy was slower than expected. The outbreak of European debt crisis recently also hampered global market recovery.

The Group was able to secure and fulfill two transportation contracts for the Group's vessel m/v Asian Atlas during the Period albeit operated under keen competitive and difficult environment. This segment recorded a loss of approximately HK\$20.2 million for the Period. After adjusting for the write-off of a trade receivable of HK\$7.4 million and HK\$1.3 million drydocking expenses as mentioned below, the adjusted segment loss was approximately HK\$11.5 million which was comparable to the Previous Period's figure of HK\$12.6 million.

Included in the vessel chartering segment loss for the Period was a write-off of a trade receivable of around US\$942,000 (approximately HK\$7,350,000). The trade receivable was outstanding demurrage charges originated from a voyage in 2009. As a result of a number of efforts, the trade debtor offered and it was agreed with the trade debtor on a smaller sum as full settlement of demurrage charges and release and discharge each other from all relevant claims and actions. The Group accepted that offer for settlement on the fact that approximately HK\$2.8 million legal fee had already been incurred, and to carry on the legal proceedings might involve lengthy process with additional legal fee to incur with uncertain amount. This would increase the financial burden to the Group. After weighing carefully the costs and benefits, the Group had accepted the offer for settlement.

Business Review and Outlook (Continued)

To preserve the competitiveness of m/v Asian Atlas, a small scale dry docking exercise was conducted during the Period. The spending paid to the shipyard was approximately US\$164,000 (approximately HK\$1,279,000).

The economy worldwide exhibited up and down trend after the end of the Period. Some enquiries about the shipment have been received and contract negotiations are in progress but no concrete results have been achieved up to date of this report. Besides having committed to work harder in order to solicit more businesses for the remaining period of the financial year, the management will preliminarily explore the possibility of chartering the vessel on a periodical basis or acquiring other type of vessels. The management will carry out a throughout study to formulate a plan for the Group to pursue and enhance the Group's wealth and development.

Material Acquisition and Disposals

The Group did not have material acquisition and disposals during the Period.

Capital Investment and Commitments

The Group did not have significant capital investment and commitments during the Period.

Liquidity, Financial Resources and Gearing

The Group generally finances its operations with internally generated resources. The Group's gearing ratio, calculated by dividing total borrowings by total equity, was 55.2% as at the end of the Period (31 March 2011: 11.8%). The liquidity ratio, being the ratio of current assets over current liabilities as at 30 September 2011 was 44.9% (31 March 2011: 126.2%).

The deterioration of both the gearing ratio and the current ratio during the Period was due to the operating loss incurred by the Group.
